## FOREWORD

The present document is the second edition of the WHO bibliography in the field of environmental health. It includes bibliographic references of material produced by WHO and related bodies in the environmental health field.

The references are organized in six chapters, five of them corresponding to the Environmental Health subprogrammes: Community Water Supply and Sanitation, Environmental Health in Rural and Urban Development and Housing, Environmental Management for Vector Control, Prevention of Environmental Pollution, Promotion of Chemical Safety. Though the Food Safety subprogramme is now attached to the Division of Health Promotion and Protection, its bibliographic references have been kept in this bibliography, as food safety is closely related to environmental health.

Each chapter is further divided into two sections: Publications<sup>1</sup> and Technical documents<sup>2</sup>. References are sorted according to the following keys: year of publication, corporate authors, personal authors, titles. Languages available are indicated in brackets at the end of each reference (eng = english; fre = french; spa = spanish; ru = russian, german, arabic, chinese).

Each chapter is followed by a subject index, and a general subject index covering the entire bibliography, is included as Chapter 7.

<sup>1</sup>The word "publications" used in this bibliography corresponds to the material published by the WHO Office of Publications; publications are submitted to the approval of the World Health Assembly and undergo a thorough process of revision. WHO publications are sold through the Distribution and Sales Service at Headquarters, in Regional Offices and commercial distributors.

<sup>2</sup>WHO technical documents are material produced by technical units and which is not submitted to the process of revision established for publications. The responsibility for issuing and distributing these documents rests with the units.

## INTRODUCTION

Le présent document est la seconde édition de la bibliographie de l'OMS dans le domaine de l'hygiène de l'environnement. Elle comporte des références bibliographiques de travaux publiés en cette matière par l'OMS et des organes associés.

Les références bibliographiques sont organisées en six chapitres dont cinq correspondent aux sous-programmes de l'Hygiène de l'Environnement : Approvisionnement Public en Eau et Assainissement, Hygiène de l'Environnement dans l'Aménagement Rural et Urbain et l'Habitat, Aménagement de l'Environnement pour la Lutte contre les Vecteurs, Prévention de la Pollution de l'Environnement, Promotion de la Sécurité des Substances Chimiques. Bien que le sous-programme Sécurité Alimentaire soit maintenant rattaché à la Division Protection et Promotion de la Santé, les références bibliographiques relatives à la sécurité alimentaire ont été conservées dans cette deuxième édition, dans la mesure où ce domaine est étroitement lié à l'hygiène du milieu.

Chaque chapitre est divisé en deux sections: publications<sup>3</sup> et documents techniques<sup>4</sup>. Les références sont classées selon les critères suivants : année de publication, auteurs corporatifs, auteurs personnels, titres. Les langues disponibles sont indiquées entre parenthèses à la fin de chaque référence (eng = anglais; fre = français; spa = espagnol; arabe; allemand; chinois; ru = russe). arabic, chinese)

Chaque chapitre est suivi d'un index par sujet. Un index général couvrant l'ensemble de la bibliographie figure au chapitre 7.

---

<sup>3</sup>Le terme "publication" utilisé dans cette bibliographie correspond aux travaux publiés par le Bureau des Publications de l'OMS; les publications sont soumises à l'approbation de l'Assemblée Mondiale de la Santé et subissent une procédure approfondie de révision. Les publications de l'OMS sont vendues par le Service de Distribution et Vente du siège, les Bureaux régionaux et des distributeurs commerciaux.

<sup>4</sup>Les documents techniques de l'OMS sont produits par les unités techniques et ne sont pas soumis à la procédure de révision établie pour les publications. La responsabilité de leur publication et de leur distribution relève des unités.
